## Profoot MXSi<sup>20</sup>

Lano Sports proudly introduces its unique Profoot MXSi<sup>20</sup>, a revolutionary product at the cutting edge of the latest technologies and building on the solid and excellent reputation of the MXS range. No other product comes close!

- Two tone polyethylene monofilament yarn
- Approx. 360µ, diamond profile
- Especially engineered polymer for unrivaled long term features
- No yarn splitting after 20.000 Lisport cycles
- Grass blades are upright after 20.000 Lisport cycles
- Approx. 360µ diamond profile yarn for long lasting ball roll control
- Design polymer for soft touch combined with hard wearing
- Real two tone yarn for natural look and good coverage (green-looking pitch)
- Playing characteristics remain in place permanently when installed onto a shock pad
- Pile heights between 40-65mm to suit different concepts
- PU backing with ecological benefits available offering superior tuft lock and improved turf durability, even in wet conditions

### Technical specifications

<b>Production Method / gauge / stitch rate:</b>	Tufted / 5 / 8" / 150/M
<b>Yarn Material / yarn type:</b>	Polyethylene / Monofilament
<b>Dtex / ends / thickness:</b>	13.620 / 6 / 360µ
<b>Pile height / Pile weight:</b>	60 mm / 1700 gr/m <sup>2</sup>
<b>Coating:</b>	Polyurethane or Latex
<b>Colours:</b>	Light green and dark green
<b>Marking lines:</b>	White, yellow & blue
<b>Type of infill:</b>	Sand + sbr
<b>Infill weight:</b>	Depends on subbase, use of shock absorbing layer and type of infill
