Football Hockey

Interplay

Hockey on a 3G-surface? Whoever said it couldn't be done hasn't seen Lano's Interplay. An innovative 2 tone surface successfully tested both for football and hockey. The ultimate combination system!

- Two tone polyethylene texturized monotape yarn
- The yarn's curly shape results in a multi-directional coverage of the sand-rubber filled surface
- Interplay is designed and certified for competitive football and recreational hockey and is ideal for the school environment
- Multi-directional two tone yarn with wide blades for superb coverage (green-looking pitch)
- Double function for major investment savings; one pitch for two sports
- Special yarn type for excellent abrasion resistance
- Yarn composition and yarn characteristics lead to consistent ball roll properties
- PU backing with ecological benefits available offering superior tuft lock and improved turf durability, even in wet conditions

Technical specifications

Production Method / gauge / stitch rate:	Tufted / 5 / 16" / 130/M
Yarn Material / yarn type:	Polyethylene / Monotape
Dtex /ends / thickness:	8.400 / 6 / 120µ
Pile height / Pile weight:	40 mm / 1350 gr/m²
Coating:	Polyurethane or Latex
Colours:	Darkgreen and lightgreen
Marking lines:	White, yellow & blue
Type of infill:	Sand + rubber
Infill weight:	Depends on subbase, use of shock absorbing layer and type of infill
